

Videocites is looking for a Software R&D Developer and Team Leader

Videocites is a growing startup in the field of online videos, building a first of its kind video-by-video search engine. Videocites is developing a cloud-based SaaS platform system for video crawling, indexing and searching all over the web.

Videocites was established by several serial entrepreneurs and three well-known CS professors.

We seek an experienced R&D developer and team leader to continue our efforts to develop the technology, scale up our product, and bring it into the market.

Basic job requirements

Experienced SW developer and manager (more than 7 years) with relevant expertise in the following:

- ✓ Big data and related technologies (Hadoop, Cassandra, Spark, Kafka)
- ✓ Cloud services (AWS and Google cloud)
- ✓ Developing tests using automation framework
- ✓ Python- a plus
- ✓ Agile (Scrum, Kanban)- a plus
- ✓ Strong oral and written communications
- ✓ Positive attitude with and eagerness to learn new skills
- ✓ Done all the way from new product definition to launching and sales
- ✓ Good management skills, able to lead a team of developers towards a required goal.
- ✓ Performer, able to meet results on time.

Education:

MSc in Computer Science or related field preferred -- or work experience
